

Lean Manufacturing Certificate Program Level 1

Overview:

The Lean Manufacturing Certificate Program is a Six Day Program (6 modules) designed to meet the training needs of companies adopting the 'lean approach' to doing business. It provides theory and application of the key lean tools. It is also intended to better support the lean approach of companies serious about improving profitability through reducing waste.

Objectives:

Upon successful completion of this interactive program, participants will be familiar with the principles and key tools supporting the company lean initiative.

Target Audience:

They should be strong contributors to the lean journey able to provide leadership on improvement teams and drive improvements in their areas of influence.

Prerequisites:

Participants should have a strong interest in Lean thinking and the commitment of their organization to the lean journey.

Who Should Attend: Those in positions requiring lean understanding to more effectively lead others selected to support the company's continuous improvement efforts.
